

Pro-Derm™

C O S M E C E U T I C S

Based on the latest clinical and scientific research, Pro-Derma Inc. has developed a line of high-quality cosmeceutical products containing active ingredients that alleviate common skin problems and enhance facial rejuvenation.

Daily use of Pro-Derm™ products can prevent the negative effects of skin aging, thereby rejuvenating and enhancing your appearance. Highly recommended by Physicians, Pro-Derm™ products help prevent photoaging and may be used in conjunction with anti-aging medical treatments such as injections for lines and wrinkles, facial peels, laser treatments and aesthetic surgery.

Pro-Derm™: The Concept

A complete line of cosmeceutical products with combined cosmetic and pharmaceutical advantages.

Cosmetic: desirable aesthetic characteristics (texture, color, smell).

Pharmaceutic: products with high concentration of active ingredients scientifically proven for clinical efficiency.

Active ingredients & Synergy

In Pro-Derm™ products, the active ingredients are in the highest concentrations and at optimal pH to ensure efficiency. Each product has many active components chosen for their additive actions of which synergism enhances dermal penetration.

Pro-Derm™ products and categories are designed to be used in conjunction to maximize results.

Quality Formulations

Unique base: In all our products, the vehicle for active ingredients is made of natural botanical extracts.

Pro-Derm™ products are perfume-free, formulated without mineral oil, alcohol, petroleum derivatives and are not tested on animals. They contain the least amount of preservatives as possible in aid of botanical ingredients with natural bactericide properties. Thereby, they are all Paraben-Free and most of them are presented in airless system dispensers which maintain the integrity of the product and help protect from contamination.

Constant optimization

The production of Pro-Derm™ products is small to permit optimization and guaranty an upgrade of all formulations.

Exclusivity

Our products are available exclusively through specialized medical clinics. They are available in drugstores with a Doctor recommendation (province of Quebec only).

Your Skin Type

Morning

Night

Optional

Normal skin (under 35)

 Gentle Cleanser
 Facial Day Cream SPF 20
 Eye Contour Cream (and/or at night)

 Gentle Cleanser
 AHA 5% or 10% Cream

 Serum-C 10%
 Regenerating Cream
 Ultra-C 10% Cream
 Liftense™
 Ultra-C Eye Contour Cream (dark circles)
 Micro-Peel masque formula
 TerreusMasque™

Normal skin (over 35)

DAY CREAMS SPF 20

•FACIAL DAY CREAM
•OPTIMAL FACIAL DAY CREAM

DIN02232205

Anti-aging Broad Spectrum Protection UVA/UVB

Category:

SPF 20 facial day creams with anti-aging properties. The Facial Day Cream is suitable for normal skin and the Optimal Facial Day Cream (with Shea Butter) is suitable for dry skin.

Instructions:

Day Creams should be applied daily in the morning or whenever you plan to be outdoors. After the face has been thoroughly cleansed with the Pro-Derm™ Gentle Cleanser, make sure your skin is dry and apply on the face, neck and upper chest as well as on the forearms, as needed. Apply 20-30 minutes before sun exposure. They can also be used as a make-up base.

Benefits:

Daily exposure to ultra-violet rays causes photoaging: dry, thin or yellowed skin, lines, wrinkles and pigmentation spots. A product that offers protection is essential to fight photoaging effects and maintain a healthy skin.

Pro-Derm™ Day Creams contain solar filters, antioxidants, anti-free radicals, anti-inflammatory agents and high quality moisturizers. The combination of these components improves the cutaneous protective effects. These creams along with anti-aging properties are enriched with Vitamins E (Tocopherol), B5, C and certified BIO Aloe.

BROAD SPECTRUM PROTECTION

VITAMIN COMPLEX

*Vitamin B₅, Vitamin C (MAP),
Vitamin E (Tocopherol)*

MOISTURIZING &

SOOTHING AGENTS

Paraben-Free

Active Ingredients

VITAMIN COMPLEX

Vitamin C (MAP): This form of Vitamin C, particularly active and easily absorbed, lightens the skin and helps to slow down the aging of the skin by inducing the synthesis of new collagen fibers (fibers which make-up the skin's structure). These fibers help the skin to resist environmental stress. MAP also regenerates an oxidized Vitamin E to an original active Vitamin E.

Natural Vitamin E (Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

Vitamin A: Anti-wrinkle and restructuring effect: stimulates collagen synthesis. The synergism of Vitamin B₅ and Vitamin A gives a toning effect. Contributes in maintaining moisture within the epidermis and the formation of the hydro-lipidic film.

Vitamin B₅: Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a toning agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

Ingredients INCI

Day Cream:

Octyl methoxycinnamate 7.5%, Avobenzone 3%, Titanium Dioxide 1.25%

Autres / Others

Aqua/Water, Glycerin, Glyceryl stearate SE, Caprylic/capric triglyceride, Cetyl alcohol, Squalane, Myristyl myristate, PEG-8, Allantoin, Cholesterol, Butylene glycol, Sodium citrate, Panthenol, Magnesium ascorbyl phosphate, Phenoxyethanol, Imidazolidinyl urea, Zinc gluconate, Tetrasodium EDTA, Tocopherol, Retinyl palmitate, Triethanolamine, Citric acid.

Optimal Day Cream: Octyl methoxycinnamate 7.5%, Avobenzone 3%, Titanium Dioxide 1.25%

Autres / Others

Aqua/Water, Squalane, Glyceryl stearate SE, Glycerin, Caprylic/capric triglyceride, Cetyl alcohol, Myristyl myristate, PEG-8, Shea butter (*Butyrospermum parkii*), Butylene glycol, Phenoxyethanol, Allantoin, Cholesterol, Panthenol, Magnesium ascorbyl phosphate, Imidazolidinyl urea, Zinc gluconate, Tetradosium EDTA, Tocopherol, Citric acid.

MOISTURIZING & SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Aloe Vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Bisabolol: This active plant extract is used as an anti-inflammatory, soothing and healing substance. It is recommended for sensitive skin.

Cholesterol: An excellent hydrating principle that restores the natural human lipid barrier. Pro-Derma Inc. uses Cholesterol from marine source only.

Shea Butter (Karité) (Optimal Facial Day Cream): An active ingredient, presented in a "butter" form, particularly rich in unsaponifiable materials, vitamins A, D, E, F and essential fatty acids. Extracted from a nut tree found in Central Africa, Shea Butter extract has cleansing, healing, smoothing, softening, stimulating, regenerating and protecting properties. Shea Butter is also a natural sunscreen.

Squalane: Squalene is one of the main natural components of the hydrolipidic film (acid mantle). Squalane from vegetal (olive oil) origin has a natural affinity to the skin, is easily absorbed, prevents moisture loss and restores skin suppleness and flexibility.

DAYTIME FLUID SPF 20

DIN02247760

Anti-aging For oily skin Matte effect

Category:

Non greasy, non comedogenic SPF 20 fluid for protection of skin prone to acne and skin that is oily or tends to be oily in the summer.

Instructions:

Daytime Fluid should be applied daily in the morning or whenever you plan to be outdoors. After the face has been thoroughly cleansed with the Pro-Derm™ Gentle Cleanser, make sure your skin is dry and apply on the face, neck and upper chest as well as on the forearms, as needed. Apply 20-30 minutes before sun exposure. It can be used under make-up.

Benefits:

Daily exposure to ultra-violet rays causes photoaging: dry, thin or yellowed skin, lines, wrinkles and pigmentation spots. A product that offers protection is essential to fight photoaging effects and maintain a healthy skin.

This is a non-greasy, matte lotion that contains solar filters for UVA and UVB protection. Daytime Fluid is an exclusive formulation: Vitamin E (Tocopherol) and Emblica™ (anti-free-radical and antioxidant properties). New micro-encapsulation technology enables extended solar protection.

BROAD SPECTRUM
PROTECTION UVA/UVB

VITAMIN E (TOCOPHEROL)

EMBLICA

Paraben-Free

DAYTIME FLUID SPF 20

Active Ingredients

ANTIOXIDANTS

Emblica™ (Phyllanthus emblica): Emblica™ is a novel natural biological skin care antioxidant. It is a long-lasting, very stable and broad-spectrum antioxidant. Emblica™ has no pro-oxidation activity induced by iron or copper. Emblica™ helps protect the skin from the damaging effects of free radicals, non-radical and transmission metal-induced oxidative stress.

Natural Vitamin E (Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

ZINC GLUCONATE

Effective in the treatment of minor and mild acne, antiseptic and anti-inflammatory, the Zinc Gluconate is a matifying agent that limits sebum production.

VITAMIN B₅

Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a toning agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

Ingredients INCI

Avobenzone 3%, Octinoxate 3%, Octocrylene 3%, Titanium Dioxide 0.75%.

Autres / Others

Water (Aqua), Aloe barbadensis extract, PEG-8, Butylene glycol, PEG-40 hydrogenated castor oil PCA isostearate, Triethanolamine, Allantoin, Phenoxyethanol, Phyllanthus emblica fruit extract, Acrylates/C10-C30 alkyl acrylate crosspolymer, Imidazolidinyl urea, Glycerin, Zinc gluconate, Lavender (Lavendula angustifolia) oil, Carbomer, Tetrasodium EDTA, Panthenol, Tocopherol, Citric acid.

MOISTURIZING & SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Aloe Vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Glycerin: Moisturizing vegetal agent.

Lavender Essential Oil certified organic: Lavender is renowned for its many beneficial properties: healing, antiseptic, anti-inflammatory, relaxing, soothing and calming. It is used against sun burns and on irritated skin. Recommended for delicate, dry, flabby, congested, acne-prone and red-prone skin.

PRO-DERM™ SPF 60

DIN02283506

Anti-Aging Light Non-whitening

Category:

SPF 60 facial day cream. A light formula, for all skin types.

Instructions:

After the face has been thoroughly cleansed with the Pro-Derm™ Gentle Cleanser, make sure your skin is dry and apply on the face, neck and upper chest as well as on the forearms, as needed. Apply 20-30 minutes before sun exposure. It can be used under make-up.

Benefits:

Sun exposure may cause sunburn, premature aging of the skin and skin cancer. Regular use of Pro-Derm™ SPF 60 anti-UVA and UVB cream with broad spectrum protection assures an optimal defence against those harmful effects.

As a protector with a high solar protection factor, Pro-Derm™ SPF 60 cream distinguishes by its innovative formula: light, rapidly penetrating, does not leave a whitening effect and contains no colorant.

This day cream actively prevents photoaging, suits perfectly for photosensitive skin or skin prone to brown spots. Following a dermo-cosmetic treatment or skin irritation, Pro-Derm™ SPF 60 cream minimizes risks of hyperpigmentation.

Formulated with the most effective sun screens, enriched with cellular protectors (Ectoin, Omega 3-6-9, Karité), antioxidants (Emblica™, Tocopherol Vit.E) and Rosa Mosqueta essential oil, Pro-Derm™ SPF 60 cream offers a high quality protection.

ANTIOXIDANTS

Emblica, Tocopherol Vitamin E

ROSA MOSQUETA ESSENTIAL OIL

Paraben-Free

Active Ingredients

ANTIOXIDANTS

Emblica™ (Phyllanthus emblica): Emblica™ is a novel natural biological skin care antioxidant. It is a long-lasting, very stable and broad-spectrum antioxidant. Emblica™ has no pro-oxidation activity induced by iron or copper. Emblica™ helps protect the skin from the damaging effects of free radicals, non-radical and transmission metal-induced oxidative stress.

Natural Vitamin E (Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

CELLULAR PROTECTORS

Ectoin: Ectoin is an innovative natural active substance that has shown to be effective in protecting the skin against external aggressors by protecting Langerhans cells (key elements of the skin immune system), protecting DNA and cells from U-V induced damage, significantly reducing formation of skinburn cells. Ectoin also has moisture retention properties.

Omega 3-6-9: Essential fatty acids (E.F.A.) are life's indispensable substances, but are not synthesized by the organism. Omega 3, 6 and 9 have a fundamental role in the behaviour and good fluidity of membrane cells located in the epidermis. Because E.F.As extracted from animal can be contaminated by different types of pollution, the E.F.As used in Pro-Derm™ products are from high purity biological plant-sourced Omega 3, 6 and 9 concentrates for dermatological creams. The EFAs used in Pro-Derm™ products have protecting properties against UV inflammation and enhance the absorption of active ingredients (transepidermal absorption).

Shea Butter (Karité): An active ingredient, presented in a "butter" form, particularly rich in unsaponifiable materials, vitamins A, D, E, F and essential fatty acids. Extracted from a nut tree found in Central Africa, Shea Butter extract has cleansing, healing, smoothing, softening, stimulating, regenerating and protecting properties. Shea Butter is also a natural sunscreen.

ROSA MOSQUETA ESSENTIAL OIL: This precious oil is rich in essential fatty acids and Retinoic acid (Tretinoin). The Tretinoin, a derivative of Retinol (Vitamin A), produces well-known therapeutic effects in the treatment of photo-aged skin. The Tretinoin contained in the Rosa Mosqueta Essential Oil produces all the benefits but without secondary side effects usually associated: at a natural state, its action is controlled and slowly released, eliminating the risk of overdoses. Easily absorbed, Rosa Mosqueta essential oil produces a remarkable regenerative action on the skin, prevents and fights the effects of photo-aged skin. It reduces fine lines, wrinkles, scars, hyper or hypopigmentation, restores the hydration, the skin elasticity and tones.

ZINC GLUCONATE: Effective in the treatment of minor and mild acne, antiseptic and anti-inflammatory, the Zinc Gluconate is a matifying agent that limits sebum production.

MOISTURIZING & SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Glycerin: Moisturizing plant agent.

Capric-caprylic Triglycerid: A plant emollient, which hydrates dry and delicate skin.

Ingrédients INCI

Octocrylene 10%, Octinoxate 7.5%, Titanium Dioxide 3.75%, Avobenzone 3.0%, Zinc Oxide 0.45%.

Aqua/water, Glyceril stearate SE, Caprylic/capric triglyceride, Butylene glycol, Cetyl alcohol, Glycerin, PEG-8, Stearic acid, Cucurbita pepo (Pumpkin) seed oil, Butyrospermum parkii (Shea butter), Phyllanthus emblica fruit extract, Allantoin, Phenoxyethanol, Imidazolidinyl urea, Panthenol, Zinc gluconate, Ectoin, Tetrasodium EDTA, Tocopherol, Citric acid.

REGENERATING CREAM

Anti-aging Moisturizing Soothing

Category:

Anti-aging, moisturizing and soothing cream. Suits for all skin types and particularly for sensitive, red or rosacea-prone skin.

Instructions:

Apply when needed, as frequently as desired.

Benefits:

Anti-wrinkle, antioxidant and antiradical, Pro-Derm™ Regenerating Cream has been formulated to moisturize and regenerate sensitive and blotchy skin. It helps diminish and relieve redness caused by certain skin conditions, as well as by exposure to the elements, to AHA or retinoids, peels and laser treatments.

The addition of Matrixyl™ at 5%, Amino-Acids, Mucopolysaccharides, Glycosaminoglycans, Ceramides (Toniskin™), Omega 3-6-9, and Hyaluronic Acid provides the additional benefits of preserving and toning the skin. Enriched with Vitamins A, C and E.

This product is very soothing and the MAP (Vit. C, active ingredient) stimulates the collagen synthesis.

Polypeptide represents 12% of total active ingredients

REGENERATING CREAM

Active ingredients

-TARGETED ANTI-AGING ACTIONS

Matrixyl™ 5%: A pentapeptide that mimics a fragment of procollagen type I, which is proven to stimulate collagen synthesis and improve photoaged skin (caused by UVA-UVB, pollution, tanning salon). Clinical studies have shown positive changes in elastine and collagen concentrations, resulting in a decrease in depth, volume and length of wrinkles. Studies have shown all these benefits without irritation and dryness normally associated with other wrinkle treatments.

Glycosaminoglycans: Glycosaminoglycans are natural components of the human body. As an active ingredient, Glycosaminoglycans from marine origin produce an instant lift effect. Pharmaceutical and biochemical research indicates that Glycosaminoglycans promote the ability of collagen fibres to retain water and bind moisture.

Toniskin™: A yeast active that works to reinforce the cohesion between the dermis and the epidermis, thus favoring tissue restoration. Toniskin™ stimulates the formation of collagen IV, VII and integrin. It preserves the cohesion and stability of dermo-epidermic junction. This active helps to preserve, tone and improve the face contour.

Omega 3-6-9: Essential fatty acids (E.F.A.) are life's indispensable substances, but are not synthesized by the organism. Omega 3, 6 and 9 have a fundamental role in the behaviour and good fluidity of membrane cells located in the epidermis. Because E.F.As extracted from animal can be contaminated by different types of pollution, the E.F.As used in Pro-Derm™ products are from high purity biological plant-sourced Omega 3, 6 and 9 concentrates for dermatological creams. The EFAs used in Pro-Derm™ products have protecting properties against UV inflammation and enhance the absorption of active ingredients (transepidermal absorption).

Hyaluronic Acid: In view of its high relative molecular mass, the Hyaluronic Acid is not absorbed following the application to the skin. Instead, it forms a thin, light, permeable, invisible, visco-elastic surface film. This fixes the moisture on the surface of the skin. Hyaluronic Acid is an excellent water reservoir. The film of Hyaluronic Acid helps to preserve the principal characteristics of young, healthy skin, such as smoothness, elasticity and tone.

-VITAMIN COMPLEX

Vitamin A: Anti-wrinkle and restructuring effect: stimulates collagen synthesis. The synergism of Vitamin B₅ and Vitamin A gives a toning effect. Contributes in maintaining moisture within the epidermis and the formation of the hydro-lipidic film.

Vitamin B₅: Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a tonifying agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

Vitamin C (MAP): This form of Vitamin C, particularly active and easily absorbed, lightens the skin and helps to slow down the aging of the skin by inducing the synthesis of new collagen fibers (fibers which make-up the skin's structure). These fibers help the skin to resist environmental stress. The MAP also regenerates an oxidized Vitamin E to an original active Vitamin E.

Natural Vitamin E (Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

-MOISTURIZING & SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Aloe vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Bisabolol: This active vegetal extract is used as an anti-inflammatory, soothing and healing substance. It is recommended for sensitive skin.

Cholesterol: An excellent hydrating principle that restores the natural human lipid barrier. Pro-Derma Inc. uses Cholesterol from marine source only.

Glycerin: Moisturizing vegetal agent.

Shea Butter (Karité): An active ingredient, presented in a "butter" form, particularly rich in insaponifiable materials, vitamins A, D, E, F and essential fatty acids. Extracted from a nut tree found in Central Africa, Shea butter extract has cleansing, healing, smoothing, softening, stimulating, regenerating and protecting properties. Shea butter is also a natural sunscreen.

Squalane: Squalene is one of the main natural components of the hydro-lipidic film (acid mantle). Squalane from vegetal (olive oil) origin has a natural affinity to the skin, is easily absorbed, prevents moisture loss and restores the skin suppleness and flexibility.

Capric-caprylic Triglyceride: A vegetal emollient, hydrates dry and delicate skin.

Lavender essential oil certified organic: Lavender is renowned for its many beneficial properties: healing, antiseptic, anti-inflammatory, relaxing, soothing and calming. It is used against sun burns and on irritated skin. Recommended for delicate, dry, flaky, congested, acne-prone and red-prone skin.

Ingredients INCI

Aqua/Water, Aloe barbadensis leaf extract, (Glycerin, Water, Butylene Glycol, Carbomer, Polysorbate 20, Palmitoyl, Pentapeptide-3) Glycerin, Glyceryl stearate SE, Caprylic/capric triglyceride, Cetyl alcohol, Allantoin, Butyrospermum parkii (Shea butter), PEG-8, Stearic acid, Glycoaminoglycans, Sclerotium Gum, Cholesterol, Butylene glycol, Squalane, Pumpkin (Cucurbita pepo) seed oil, Myristyl myristate, Sodium citrate, Panthenol, Magnesium ascorbyl phosphate, Phenoxyethanol, Imidazolidinyl urea, Bisabolol, Lavender (Lavendula angustifolia) oil, Tetrasodium EDTA, Retinyl palmitate, Yeast extract, sodium hyaluronate, Tocopherol, Citric acid, Ascorbic acid, Triethanolamine

EYE CONTOUR CREAM

Moisturizing Firming Anti-wrinkle

Category:

Moisturizing, toning, anti-wrinkle and non-irritating eye contour cream. For all skin types.

Instructions:

After the face has been thoroughly cleansed with the Pro-Derm™ Gentle Cleanser, make sure your skin is dry and apply on upper & lower eyelids before bed time and/or in the morning.

Benefits:

The anti-wrinkle Eye Contour Cream has been specially formulated with active ingredients to provide anti-aging effects. Daily application helps to improve skin tone of the eyelids, diminish fine lines and dark circles under the eyes. Enriched with 3% Matrixyl™, Omega 3-6-9, Vitamins C (MAP and L-Ascorbic Acid), A and E (Tocopherol).

Polypeptide represents 10% of total active ingredients

EYE CONTOUR CREAM

Active Ingredients

ANTI-WRINKLE AGENTS

Marixyl™ 3%: A pentapeptide that mimics a fragment of procollagen type I, which is proven to stimulate collagen synthesis and improve photoaged skin (caused by UVA-UVB, pollution, tanning salon). Clinical studies have shown positive changes in elastine and collagen concentrations, resulting in a decrease in depth, volume and length of wrinkles. Studies have shown all these benefits without irritation and dryness normally associated with other wrinkle treatments.

VITAMIN COMPLEX

Vitamin A: Anti-wrinkle and restructuring effect: stimulates collagen synthesis. The synergism of Vitamin B₅ and Vitamin A gives a toning effect. Contributes in maintaining moisture within the epidermis and the formation of the hydro-lipidic film.

Vitamin B₅: Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a toning agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

Vitamin C 1%:

MAP: This form of Vitamin C, particularly active and easily absorbed, lightens the skin and helps to slow down the aging of the skin by inducing the synthesis of new collagen fibers (fibers which make-up the skin's structure). These fibers help the skin to resist environmental stress. MAP also regenerates an oxidized Vitamin E to an original active Vitamin E.

L-Ascorbic Acid: Anti-wrinkle and antioxidant, L-Ascorbic Acid neutralizes free radicals responsible for aging the skin, increases your skin's resistance to pollutants and ultra-violet rays and improves your skin tone.

Natural Vitamin E (Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

FIRMING AGENT

Caffeine: Pure caffeine has toning properties.

MOISTURIZERS AND SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Aloe Vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Shea Butter (Karité): An active ingredient, presented in a "butter" form, particularly rich in unsaponifiable materials, vitamins A, D, E, F and essential fatty acids. Extracted from a nut tree found in Central Africa, Shea Butter extract has cleansing, healing, smoothing, softening, stimulating, regenerating and protecting properties. Shea Butter is also a natural sunscreen.

Squalane: Squalene is one of the main natural components of the hydro-lipidic film (acid mantle). Squalane from vegetal (olive oil) origin has a natural affinity to the skin, is easily absorbed, prevents moisture loss and restores the skin suppleness and flexibility.

Ingredients INCI

Aqua, Glyceryl stearate (and) PEG-100 stearate, PEG-8, Butylene glycol, Caprylic/capric triglyceride, (Glycerine, Aqua, Butylene glycol, Carbomer, Polysorbate20, Palmitoyl Oligopeptide, Tetrapeptide-7), Cetyl alcohol, Shea butter (Butyrospermum parkii), Imidazolidinyl urea, Magnesium ascorbyl phosphate, Caffeine, Squalane, Rosehip (Rosa rubiginosa) seed oil, Pumpkin (Cucurbita pepo) seed oil, Allantoin, Sodium citrate, Phenoxyethanol, Panthenol, Tocopherol, Tetrasodium EDTA, Citric acid, Ascorbic acid, Triethanolamine.

PRO-DERMAFILINE BODY CREAM

Firming Exfoliating Moisturizing

Category:

Firming and anti-cellulite body cream, for all skin types.

Instructions:

For maximum effectiveness, apply a small amount on clean and dry skin to cellulite-prone areas once a day in the morning. Do not apply immediately after bathing, shaving or on irritated skin. Use Pro-Dermafiline in a circular motion, until completely absorbed. Do not massage vigorously. Regular use of Pro-Dermafiline restores and leaves a smooth appearance to the skin. Pro-Dermafiline Cream enhances results of Accent, VelaSmooth, Thermage and Endermology treatments, as well as results of Liposuction and Therapeutic massages.

Benefits:

An anti-cellulite body cream designed for firming, moisturizing and exfoliating. Regular use of Pro-Dermafiline restores and maintains smooth skin. Experience its rapid effect in firming all parts of the body, even delicate areas such as the neck and under the chin. Active ingredients are pure 5% Caffeine, 5% AHA, Vitamins A and E, Amino Acids, Amino-peptides and Glycosaminoglycans. This cream is enriched with Geranium, Cypress and Borage essential oils.

PRO-DERMAFILINE BODY CREAM

Active ingredients

FIRMING AGENTS

Caffeine 5%: Pure caffeine has toning properties. With a high concentration (5%), it has thinning properties and accelerates the elimination of excess fats to fight cellulite.

Geranium essential oil: Tonifying, healing, antiseptic, it soothes blemishes, skinburns and revitalizes dry skin.

Cypress essential oil: This essential oil, extracted from the cypress nut, has been used since the longest time. It improves, by its profound action on the venous circulation, blood flow, fights against bad return circulation and lack of elasticity of the arteries and the veins. It is recommended for varicosity, cellulite and heavy legs.

-LACTIC ACID 5%

It is an AHA from a natural source particularly effective for body cares. It exfoliates dead skin cells, stimulates cellular rejuvenation, makes your skin smooth and opens it to moisturizing agents. Lactic Acid exfoliates better and more evenly than any mechanical agent (mechanical scrubs work only to remove already loosened skin cells on the upper layer of skin).

-VITAMIN COMPLEX

Vitamin A: Anti-wrinkle and restructuring effect: stimulates collagen synthesis. The synergism of Vitamin B5 and Vitamin A gives a toning effect. Contributes in maintaining moisture within the epidermis and the formation of the hydro-lipidic film.

Vitamin B₅: Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a tonifying agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

Natural Vitamin E (Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E (Tocopherol) was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

-MOISTURIZING & SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey-roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Glycerin: Moisturizing vegetal agent.

Capric-caprylic Triglyceride: A vegetal emollient, hydrates dry and delicate skin.

Borage essential oil: An alpha-linoleic acid with moisturizing properties. Restructures the natural lipidic barrier.

Ingredients INCI

Water (Aqua), PEG-100 Stearate (and) Glyceryl Stearate, Caffeine, Lactic Acid, Caprylic/Capric Triglyceride, Butylene Glycol, PEG-8, Stearic Acid, Water (and) Glycosaminoglycans (and) Sclerotium Gum, Sodium Hydroxide, Allantoin, Cetyl Alcohol, Phenoxyethanol, Butyrospermum Parkii (Shea Butter), Myristyl Myristate, Imidazolidinyl Urea, Cupressus Sempervirens Oil, Cucurbita Pepo (Pumpkin) Seed Oil, Rosa Canina (Rosehip) Fruit Oil, Pelargonium Graveolens Flower Oil, Panthenol, Sodium Hyaluronate, Tetrasodium EDTA, Sorbitol (and) Yeast Extract, Tocopherol, Retinol.

HYDROGEL

Soothing & Healing

Category:

Dermo-calming and lightly moisturizing gel for body and face. For all skin types.

Instructions:

Particularly indicated to promote healing. Apply immediately after laser treatments, sunburns, hair removal or other skin irritations. Repeat as needed to the sensitive areas. Use daily after bathing, showering or shaving to restore the skin's protective film.

Benefits:

Hydrogel rapidly soothes skin reddened or irritated by hair removal or laser treatments. It also relieves stretched or itchy skin. A synergy of plant and marine active ingredients having antioxidant, anti-free radical, anti-inflammatory, antiviral, antifungal and antibacterial properties ensures exceptional efficacy. Pro-Derm™ Hydrogel is enriched with Vitamin C, Omega 3-6-9, Sea Fennel, BIO Aloe, Everlasting and Geranium essential oils.

Paraben-Free

HYDROGEL

Active Ingredients

ANTIOXIDANTS

Everlasting (*Helichrysum italicum*) Essential Oil: With three types of Flavonoids, it has antioxidant, antiseptic, anti-inflammatory, antimicrobial, antifungal, anti-infectious, antiviral and lightly anticoagulating properties.

Sea Fennel: Rich in Flavonoids, Zinc, Iron, Magnesium, Manganese, Copper, Vitamins C and E, it has antioxidant, antiseptic, anti-inflammatory and antimicrobial activity. The Sea Fennel has toning properties and stimulates the peripheral circulation.

Geranium Essential Oil: Toning, healing, antiseptic, it soothes blemishes, skinburns and revitalizes dry skin.

OMEGA 3-6-9

Essential fatty acids (E.F.A.): Omega 3, 6 and 9 are life's indispensable substances, but are not synthesized by the organism. Omega 3, 6 and 9 have a fundamental role in the behaviour and good fluidity of membrane cells located in the epidermis. Because E.F.As extracted from animal can be contaminated by different types of pollution, the E.F.As used in Pro-Derm™ products are from high purity biological plant-sourced Omega 3, 6 and 9 concentrates for dermatological creams. The EFAs used in Pro-Derm™ products have protecting properties against UV inflammation and enhance the absorption of active ingredients (transepidermal absorption).

VITAMIN B₅

Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a toning agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

MOISTURIZING AND SOOTHING AGENTS

Aloe Vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Bisabolol: This active plant extract is used as an anti-inflammatory, soothing and healing substance. It is recommended for sensitive skin.

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Ingredients INCI

Aqua, Aloe barbadensis extract, Glycerin, Allantoin, PEG-8, Butylene glycol, Sea Fennel (Crithmum maritimum) extract, Panthenol, Carbomer, PEG-40 hydrogenated castor oil PCA isostearate, Bisabolol, Disodium EDTA, Geranium (Pelargonium roseum) oil, Everlasting (Helichrysum italicum) oil, Citric acid, Mentha piperata oil, Phenoxyethanol.

LIFTENSE™

Lift effect Anti-aging

Category:

Anti-wrinkle, antioxidant, moisturizing, «lift effect» cream for face, eye contour and neck. For all skin types.

Instructions:

After cleansing with Pro-Derm™ Gentle Cleanser, apply Liftense™ morning and night, allow to penetrate. If a protective cream with SPF factor is needed, Pro-Derm™ sunscreens are compatible.

Benefits:

Liftense™ is a technological breakthrough product to improve expression lines and wrinkles. Liftense™ is an unprecedented formulation of high-tech active bio-ingredients: Peptides and Polypeptides, Argireline™ 10% (Botox™-like action), Matrixyl™ 5%, Bioxilift™ (Botox®-like action), Toniskin™, Rigin™ (mimics the natural DHEA) also called the “youth hormone”, Marine Native-Collagen, Hyaluronic Acid, Omega 3-6-9 etc., each of which has been individually clinically proven. This formulation has been particularly developed for its targeted anti-aging actions.

To protect skin from damaging effects of free radicals, Liftense™ is enriched with the best antioxidants: Emblica™, SOD (Superoxide Dismutase) and natural Tocopherol (Vit. E).

Liftense™ is a light cream containing Shea Butter (Karité), Bio-Rosehip and Rosewood essential oils. It leaves the skin soft and pleasantly matte. Liftense™ helps to optimize injections results (Botox®, Hyaluronic Acid, etc.) and is an excellent complement to laser treatments.

Polypeptide complex represent 30.5% of total active ingredients.

ANTI-WRINKLE AGENTS

Active ingredients

-TARGETED ANTI-AGING ACTIONS

Matrixyl™ 5%: A pentapeptide that mimics a fragment of procollagen type I, which is proven to stimulate collagen synthesis and improve photoaged skin (caused by UVA-UVB, pollution, tanning salon). Clinical studies have shown positive changes in elastine and collagen concentrations, resulting in a decrease in depth, volume and length of wrinkles. Studies have shown all these benefits without irritation and dryness normally associated with other wrinkle treatments.

Hyaluronic Acid: In view of its high relative molecular mass, the Hyaluronic Acid is not absorbed following the application to the skin. Instead, it forms a thin, light, permeable, invisible, visco-elastic surface film. This fixes the moisture on the surface of the skin. Hyaluronic Acid is an excellent water reservoir. The film of Hyaluronic Acid helps to preserve the principal characteristics of young, healthy skin, such as smoothness, elasticity and tone.

Argireline™ 10%: Argireline™, at 10% concentration in Pro-Derm™ Liftense™, offers superior anti-wrinkle efficacy. Argireline™ is a new peptide, hexapeptid-3, that both reduces the degree of existing facial wrinkles and has been demonstrated effective against their development. It has been shown to inhibit the formation of the SNARE complex, as well as catecholamine release. These inhibitions confer anti-aging activity on Argireline™; they closely relate to the basic biochemical mechanisms of wrinkle formation. Prevention: controlled studies have demonstrated that facial wrinkles depth can be reduced, especially in the forehead and around the eyes and that Argireline™ can prevent apparent facial skin aging. Even if the expression "Botox-like" is mentioned in the literature, Argireline™ will never replace injections of Botox® by Doctors. Argireline™ acts in complementarity with injections.

Bioxilift™ (Pimpinella anisum): Extracted from anise and rich in minerals, Bioxilift™ contains ingredients with anti-aging properties. This polypeptide works by modulating the formation of a complex which is involved in muscle stimulation and works in synergism with Argireline™.

Toniskin™ (extrait de levure): Toniskin™ (5%), a yeast active, works to reinforce the cohesion between the dermis and the epidermis, thus favoring tissue restoration. Toniskin™ stimulates the formation of collagen IV, VII and integrin. It preserves the cohesion and stability of dermo-epidermic junction. This active helps to preserve, tone and improve the face contour.

Rigin™: Rigin™ is a lipopeptide which mimics the body's natural DHEA (dehydroepiandrosterone) also called "youth hormone". It controls the basal secretion of interleukin 6, which is responsible for aging symptoms. Results from clinical studies indicate Rigin™ delays the aging process, improves elasticity, tones, hydrates and smoothes the skin.

-ANTIOXIDANTS

Superoxide Dismutase: S.O.D. is the most powerful enzyme produced by our body. Our skin has S.O.D. in both the dermis and the epidermis that regulates the metabolism and functions of the cell, especially the fibroblasts (skin building cells). S.O.D. is a powerful antioxidant that scavenges free-radicals. These radicals cause oxidative damage that reduces the ability of the cell to reproduce itself, thereby responsible for what we commonly refer to as "aging". S.O.D. detoxifies these cells, restoring their ability to reproduce and remain young. Other characteristics of S.O.D.: protection of Hyaluronic Acid against oxygen radicals, protection of the skin against the UV-induced lipoperoxidation.

Emblica™: Emblica™ is a novel natural biological skin care antioxidant. It is a long-lasting, very stable and broad-spectrum antioxidant. Emblica™ has no pro-oxidation activity induced by iron or copper. Emblica™ helps protect the skin from the damaging effects of free radicals, non-radical and transmission metal-induced oxidative stress.

Natural Vitamin E (α-Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E (α-Tocopherol) was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

Note: tocopheryl acetate is not metabolized to free α-Tocopherol and in laboratory on mouse studies, tocopheryl acetate failed to inhibit UVB-induced immunosuppression and appeared to enhance carcinogenesis. Pro-Derma Inc. does not use tocopheryl acetate.

-MOISTURIZING AGENTS

Collagen-Marine: Collagen-Marine is a protein, Collagen-M has properties: it helps to slow down the signs of premature aging and to reduce fine lines and wrinkles by radically improving the hydration and elasticity of the skin.

Omega 3-6-9: Essential fatty acids (E.F.A.) are life's indispensable substances, but are not synthesized by the organism. Omega 3, 6 and 9 have a fundamental role in the behaviour and good fluidity of membrane cells located in the epidermis. Because E.F.As extracted from animal can be contaminated by different types of pollution, the E.F.As used in Pro-Derm™ products are from high purity biological plant-sourced Omega 3, 6 and 9 concentrates for dermatological creams. The EFAs used in Pro-Derm™ products have protecting properties against UV inflammation and enhance the absorption of active ingredients (transepidermal absorption).

Ingredients INCI

Aqua, Aloe barbadensis Leaf Juice, Acetyl Hexapeptide-3, Caprylic/capric triglyceride, Glycerin, Butylene glycol, Carbomer, Polysorbate 20, Palmitoyl pentapeptide-3, Glyceryl Stearate (and) PEG-100 Stearate, Pimpinella anisum (Anise) Fruit extract, Horsetail (Equisetum arvense) extract, Yeast (Saccharomyces cerevisiae) extract (Faex), Soluble collagen, Glycerin, Stearic acid, PEG-8, Butylene glycol, Glycerin, Steareth-20, Palmitoyl Tetrapeptide 3, Glycoaminoglycans (and) Sclerotium Gum, Rosehip (Rosa rubiginosa seed oil), Pumpkin (Cucurbita pepo) seed oil, Allantoin, PhytoCholesterol, Shea butter (Butyrospermum parkii), Phenoxyethanol, Phyllanthus emblica fruit extract, Imidazolidinyl urea, Sodium hyaluronate, Superoxide Dismutase, Rosewood (Aniba), Panthenol, Retinyl palmitate, Disodium EDTA, Tocopherol, Manganese gluconate

AHA CREAMS

Exfoliating Anti-aging Lightening

Category:

Exfoliating and smoothing facial creams with 5% or 10% Glycolic Acid. For normal, dry, damaged or rough skin.

Instructions:

After the face has been thoroughly cleansed with the Pro-Derm™ pH balanced Gentle Cleanser, make sure your skin is dry and then apply the Pro-Derm™ AHA Cream to the face and neck. Apply at night. A mild tingling sensation when applying the cream indicates that the product is active on the skin. The AHA 10% Cream is reserved for those who have already taken advantage of the anti-aging effects of the AHA 5% Cream and whose skin have adapted to the exfoliating properties of Glycolic Acid.

Benefits:

An exclusive formula with Alpha-Hydroxy-Acid (Glycolic Acid). The anti-wrinkle, exfoliating and lightening effect is maximized by a vitamin complex. These non-oily creams contain natural moisturizing and soothing ingredients.

These creams with Glycolic Acid improve suppleness and skin texture, close dilated pores, reduce acne and other skin imperfections. They also prevent and fight against the effects of photoaging (dry, thin or yellowed skin, lines, wrinkles and pigmentation spots).

AHA CREAMS

Active Ingredients

GLYCOLIC ACID

It is an exfoliant and a skin lightener with anti-wrinkle properties. Glycolic Acid deeply exfoliates the skin. As it closes the facial pores, it refines the skin texture, prevents and eliminates black-heads and reduces skin breakouts due to acne.

Glycolic Acid, an AHA from a natural source, stimulates renewal of the epidermis. After only a few days, you will notice a more radiant complexion and this is just the beginning of a sustained effect on fine lines and wrinkles. Non neutralized Glycolic Acid, with a natural pH, works on the deep layers of the skin to promote the production of collagen and elastin fibers.

Its action also increases the skin's receptiveness to the action of active ingredients of other Pro-Derm™ products.

VITAMIN COMPLEX

MOISTURIZERS & SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Glycerin: Moisturizing vegetal agent.

Shea Butter (Karité): An active ingredient, presented in a "butter" form, particularly rich in unsaponifiable materials, vitamins A, D, E, F and essential fatty acids. Extracted from a nut tree found in Central Africa, Shea Butter extract has cleansing, healing, smoothing, softening, stimulating, regenerating and protecting properties. Shea Butter is also a natural sunscreen.

Squalane: Squalene is one of the main natural components of the hydrolipidic film (acid mantle). Squalane from vegetal (olive oil) origin has a natural affinity to the skin, is easily absorbed, prevents moisture loss and restores the skin suppleness and flexibility.

Capric-caprylic Triglyceride: A vegetal emollient, which hydrates dry and delicate skin.

Lavender Essential Oil certified organic: Lavender is renowned for its many beneficial properties: healing, antiseptic, anti-inflammatory, relaxing, soothing and calming. It is used against sun burns and on irritated skin. Recommended for delicate, dry, flabby, congested, acne-prone and red-prone skin.

Rosewood Essential Oil: Due to its powerful ability to regenerate, soothe and tone the skin, it is highly recommended for facial care. It vitalizes dull, stressed, tired, fragile and irritated skin. This essential oil has a pronounced anti-wrinkle effect and restores the skin's elasticity.

Ingredients INCI

5%: Aqua, Aloe Barbadensis Leaf Extract, PEG-100 Stearate (and) Glyceryl Stearate, Butylene Glycol, Glycolic Acid, Caprylic/Capric Triglyceride, Stearic Acid, Cetyl Alcohol, Butyrospermum parkii (Shea Butter), Squalane, Glycerin, Allantoin, Myristyl Myristate, Phenoxyethanol, Panthenol, Pelargonium Graveolens Flower Oil, Cupressus Sempervirens Oil, Ascorbic Acid, Citric Acid.

10%: Aqua, Aloe Barbadensis Leaf Extract, Glycolic Acid, PEG-100 Stearate (and) Glyceryl Stearate, Butylene Glycol, Caprylic/Capric Triglyceride, Stearic Acid, Cetyl Alcohol, Butyrospermum parkii (Shea Butter), Squalane, Glycerin, Allantoin, Myristyl Myristate, Phenoxyethanol, Panthenol, Pelargonium Graveolens Flower Oil, Cupressus Sempervirens Oil, Ascorbic Acid, Citric Acid.

AHA BHA LOTIONS

|♀♂|

Exfoliating Matte finish Lightening

Category:

Recommended for normal skin or oily skin prone to light acne, blackheads, dilated pores or ingrown hairs (8-2).

Instructions:

After the face has been thoroughly cleansed with the Pro-Derm™ pH balanced Gentle Cleanser, make sure your skin is dry and apply the Pro-Derm™ Lotion. Apply at night. The 8-2 Lotion has greater exfoliating action than the 5-2 Lotion; it is recommended to start with the 5-2 Lotion (if applied to the face). The 8-2 Lotion is particularly effective in clearing up ingrown hairs that cause blemishes and improves keratosis pilaris (in those cases, it is not necessary to start with the 5-2 Lotion). For a more advanced acne problem, follow your professional's recommendations by using DermAcnil™.

Benefits:

AHA-BHA Lotions contain Glycolic Acid (5% or 8%) and Salicylic Acid (2%). The exfoliant formula is light, has a matte finish and is enriched with essential oils. They lighten complexion, reduce acne breakouts and blackheads. These lotions are non irritating.

GLYCOLIC ACID

SALICYLIC ACID

MOISTURIZING &
SOOTHING AGENTS

AHA BHA LOTIONS

Active Ingredients

AHA & BHA: Glycolic Acid, an AHA from a natural source, stimulates renewal of the epidermis. After only a few days, you will notice a more radiant complexion and this is just the beginning of a sustained effect on fine lines and wrinkles. Non neutralized Glycolic Acid, with a natural pH, works on the deep layers of the skin to promote the production of collagen and elastin fibers.

Like AHA, Salicylic Acid is a component of the Hydroxy Acid family, which is known for inducing cutaneous exfoliation. This unique acid can enter the milieu of the sebaceous unit, inducing exfoliation in the oily areas of the face. For this reason, it is particularly effective in treating comedonal acne.

Together, Glycolic Acid and Salicylic Acid efficiently exfoliate the skin, prevent and diminish acne breakouts as well as black-heads.

ZINC GLUCONATE: Effective in the treatment of minor and mild acne, antiseptic and anti-inflammatory, the Zinc Gluconate is a matifying agent that limits sebum production.

VITAMIN B₅: Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a toning agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

MOISTURIZING & SOOTHING AGENTS:

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Aloe Vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Bisabolol: This active plant extract is used as an anti-inflammatory, soothing and healing substance. It is recommended for sensitive skin.

Glycerin: Moisturizing plant agent.

Capric-caprylic Triglyceride: A plant emollient, hydrates dry and delicate skin.

Lavender Essential Oil certified organic: Lavender is renowned for its many beneficial properties: healing, antiseptic, anti-inflammatory, relaxing, soothing and calming. It is used against sun burns and on irritated skin. Recommended for delicate, dry, flabby, congested, acne-prone and red-prone skin.

Rosewood Essential Oil: Due to its powerful ability to regenerate, soothe and tonify the skin, it is highly recommended for facial care. It vitalizes dull, stressed, tired, fragile and irritated skin. This essential oil has a pronounced anti-wrinkle effect and restores the skin's elasticity.

Ingredients INCI

5-2: Aqua, Aloe Barbadensis Leaf Extract, Glycolic Acid, PEG 100 Stearate (and) Glyceryl Stearate, Butylene Glycol, PEG-8, Glycerin, Salicylic Acid, Stearic Acid, Caprylic/Capric Triglyceride, Phenoxyethanol, Allantoin, Bisabolol, Zinc PCA, Hydroxyethylcellulose, Panthenol, Caprylic/Capric Triglyceride, Tetrasodium EDTA, Lavandula Angustifolia (Lavender) Oil, Aniba Rosaedora (Rosewood) Wood Oil, Ascorbic Acid, Triethanolamine.

8-2: Aqua, Aloe Barbadensis Leaf Extract, Glycolic Acid, PEG 100 Stearate (and) Glyceryl Stearate, Butylene Glycol, PEG-8, Glycerin, Salicylic Acid, Stearic Acid, Caprylic/Capric Triglyceride, Phenoxyethanol, Allantoin, Bisabolol, Zinc PCA, Hydroxyethylcellulose, Panthenol, Caprylic/Capric Triglyceride, Tetrasodium EDTA, Lavandula Angustifolia (Lavender) Oil, Aniba Rosaedora (Rosewood) Wood Oil, Ascorbic Acid, Triethanolamine.

DERMACNIL™

|♀♂|

Anti-acne Exfoliating Lightening

Category:

Recommended for normal skin or oily skin prone to acne, blackheads and dilated pores. Can be used in combination with other anti-acne therapy.

Instructions:

Use at night. After the face has been thoroughly cleansed with the Pro-Derm™ pH balanced Gentle Cleanser, make sure your skin is dry, apply a thin layer and allow to dry. Expires three months after opening. Refrigeration helps to extend the usage.

Benefits:

DermAcnil™ lotion is effective in the treatment and prevention of comedonic and inflammatory acne due to the synergistic action of three active ingredients: 2.5% Benzoyl Peroxide, 5% Glycolic Acid (AHA) and 2% Salicylic Acid (BHA). DermAcnil™ lotion removes blackheads, unclogs impurities and lightens your skin, while exfoliating and softening. DermAcnil™ is formulated in a light moisturizing, mild and non-irritating base that assures good tolerance.

3 in 1 PRODUCT:

- GLYCOLIC ACID
- SALICYLIC ACID
- BENZOYL PEROXIDE

SOOTHING AGENTS

Paraben-Free

Active Ingredients

AHA & BHA: Glycolic Acid and Salicylic Acid are effective to prevent formation of comedones while exfoliating, lightening, smoothing and lightly moisturizing the skin. Glycolic Acid also facilitates Benzoyl Peroxide penetration.

BENZOYL PEROXIDE: A bacteriostatic that penetrates to stop inflammation and acne-causing bacteria (P.Acnes bacteria) at the source.

ZINC GLUCONATE: Effective in the treatment of minor and mild acne, antiseptic and anti-inflammatory, the Zinc Gluconate is a matifying agent that limits sebum production.

SOOTHING AGENTS

Allantoin, Aloe & Bisabolol: Three active ingredients of vegetal source with calming, soothing, anti-inflammatory and healing properties.

Geranium Essential Oil: Toning, healing, antiseptic, it soothes blemishes, skinburns and revitalizes dry skin.

Ingredients INCI

Aqua, Aloe barbadensis leaf extract, Butylene glycol, PEG 100 Stearate (and) Glyceryl stearate, Glycolic acid, Benzoyl peroxyde, Salicylic acid, Cetyl alcohol, Caprylic/Capric triglyceride, PEG-40 hydrogenated castor oil PCA isostearate, Allantoin, Bisabolol, Hydroxyethylcellulose, Panthenol, Zinc gluconate, Imidazolidinyl urea, Phenoxyethanol, Geranium (Pelargonium roseum) oil, Cypress (Cupressum sempervirens) oil, Tetrasodium EDTA, Triethanolamine.

MICRO-PEEL MASQUE FORMULA |♀♂|

Exfoliating Anti-aging Lightening

Category:

Masque for face, neck and chest if desired. For normal or oily skin prone to blackheads or dilated pores. Not recommended for ultra-sensitive skin.

Instructions:

After the face has been thoroughly cleansed with the Pro-Derm™ pH balanced Gentle Cleanser, make sure your skin is dry and generously apply the Micro-Peel formula (about 3 mm thick layer). A mild tingling sensation indicates that the product is active on the skin. The masque will not dry on the skin. After 20-30 minutes, take off the masque with a warm facial cloth and rinse with clear water. It can be used once a week.

Benefits:

This masque is a procedure to deeply exfoliate the skin. Upon application, it closes the facial pores, refines the grain of the skin, prevents blackheads and accelerates skin cell renewal. The Micro-Peel also makes the skin more receptive to active ingredients in other Pro-Derm™ products. It contains Glycolic Acid (AHA) stabilized by three types of mud and clay, which preserve its active properties for maximum action throughout the application.

GLYCOLIC ACID

- *Exfoliating*
- *Anti-aging*
- *Lightening*
- *Refines the grain of the skin*

Paraben-Free

MICRO-PEEL MASQUE FORMULA

Active ingredients

-GLYCOLIC ACID

It is an exfoliant and a skin lightener with anti-wrinkle properties. Glycolic Acid deeply exfoliates the skin. As it closes the facial pores, it refines the skin texture, prevents and eliminates blackheads and reduces skin breakouts due to acne.

Glycolic Acid, an AHA from a natural source, stimulates renewal of the epidermis. After only a few days, you will notice a more radiant complexion and this is just the beginning of a sustained effect on fine lines and wrinkles. Non neutralized Glycolic Acid, with a natural pH, works on the deep layers of the skin to promote the production of collagen and elastin fibers.

Glycolic Acid also increases the skin's receptiveness to the action of active ingredients of other Pro-Derm™ products.

-CHINA CLAY, BENTONITE, KAOLIN

Those three types of clay act to stabilize Glycolic Acid (AHA); they preserve its active properties for maximum action throughout the application of the masque.

-FUCUS (MARINE ALGAE)

Fucus is extracted from brown algae brought all the way from the Great Britain; it is rich in Polysaccharides, Polyphenols (antioxidant properties), Trace elements, Amino Acids and vitamins. Used for its moisturizing, remineralizing, detoxifying, revitalizing and decongesting properties. It also stimulates local blood circulation

-VITAMIN B₅

Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a tonifying agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

-PEPPERMINT ESSENTIAL OIL

Refreshing and antibacterial essential oil.

-CHLOROPHYLL (PLANT EXTRACT)

Antioxidant and anti-infectious properties (antifungus, antibacterial).

-CITRIC ACID

As an AHA, Citric Acid has lightening properties. Also acts as a pH regulator.

-SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey-roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Aloe vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Lavender essential oil certified organic: Lavender is renowned for its many beneficial properties: healing, antiseptic, anti-inflammatory, relaxing, soothing and calming. It is used against sun burns and on irritated skin. Recommended for delicate, dry, flaky, congested, acne-prone and red-prone skin.

Ingredients INCI

Aqua, Aloe barbadensis leaf extract, Caprylic/capric triglyceride, Glycolic acid 5%, Cetyl alcohol, Kaolin, Steareth 10, Butylene glycol, Stearic acid, Talc, Glyceryl stearate SE, Ginseng (Panax ginseng) extract, Allantoin, Bladderwrack (Fucus vesiculosus) extract, Bentonite, Chlorophyllin-copper complex, Phenoxylethanol, Panthenol, Imidazolidinyl urea, Lemon (Citrus medica limonum) oil, Disodium EDTA, Lavender Lavendula, Peppermint (Mentha piperita) oil, Triethanolamine.

ULTRA-C 10% CREAM

Lightening Anti-wrinkle

Category:

Lightening facial cream. For all skin types.

Instructions:

After the face has been thoroughly cleansed with the Pro-Derm™ Gentle Cleanser, make sure your skin is dry and apply the Pro-Derm™ Ultra-C cream at night over the whole face and as needed on the neck and chest. The cream can be used in the morning (when there is no sunlight or when you don't plan to be outdoors) for its beneficial matte effect. The lightening effect is progressive over a period of 1 to 6 months. Alternating every second night with a Pro-Derm™ AHA cream or AHA-BHA Lotion will help get excellent results.

To reduce and prevent any hyperpigmentation problem, it is essential to avoid sun exposure and to apply daily one of the Pro-Derm™ SPF 20 Day Cream or the Pro-Derm™ SPF 60.

For more serious problems of hyperpigmentation that require maximum performance, apply Pro-Derm™ Ultra-C cream at night alternating with an AHA BHA Lotion and apply the Pro-Derm™ Serum-C 10% every morning before the sun protection.

Benefits:

A lightening cream that reduces and prevents hyperpigmentation. It lightly moisturizes and leaves the skin matte.

With Vitamins C 10% (MAP), E and A, Ultra-C 10% Cream stimulates collagen synthesis and has antioxidant properties.

ULTRA-C 10% CREAM

Active Ingredients

VITAMIN COMPLEX

MAP 10%: This form of Vitamin C, particularly active and easily absorbed, lightens the skin and interrupts the melanin synthesis responsible of pigmentation irregularities caused by heredity, hormonal factors, repeated or extended exposure to ultraviolet rays (dyschromia, lentigo, melasma). It helps to slow down the aging of the skin by inducing the synthesis of new collagen fibers (fibers which make-up the skin's structure). These fibers help the skin to resist environmental stress. The MAP also regenerates an oxidized Vitamin E to an original active Vitamin E.

Vitamin A: Anti-wrinkle and restructuring effect: stimulates collagen synthesis. The synergism of Vitamin B₅ and Vitamin A gives a toning effect. Contributes in maintaining moisture within the epidermis and the formation of the hydro-lipidic film.

Vitamin B₅: Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a toning agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

Natural Vitamin E (Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Cholesterol: An excellent hydrating principle that restores the natural human lipid barrier. Pro-Derma Inc. uses Cholesterol from marine source only.

Glycerin: Moisturizing plant agent.

Capric-caprylic Triglyceride: A plant emollient, which hydrates dry and delicate skin.

Squalane: Squalene is one of the main natural components of the hydrolipidic film (acid mantle). Squalane from vegetal (olive oil) origin has a natural affinity to the skin, is easily absorbed, prevents moisture loss and restores the skin suppleness and flexibility.

Lavender Essential Oil certified organic: Lavender is renowned for its many beneficial properties: healing, antiseptic, anti-inflammatory, relaxing, soothing and calming. It is used against sun burns and on irritated skin. Recommended for delicate, dry, flabby, congested, acne-prone and red-prone skin.

Ingredients INCI

Aqua, Magnesium ascorbyl phosphate Vit.C, Caprylic/capric triglyceride, Glyceryl stearate (and) PEG-100 stearate, Glycerin, Butylene glycol, Squalane, Cetyl alcohol, Myristyl myristate, PEG-8, Cholesterol, Sodium citrate, Allantoin, Phenoxyethanol, Panthenol, Imidazolidinyl urea, Lavender (Lavandula angustifolia) oil, Tetrasodium EDTA, Citric acid, Tocopherol, Retinyl palmitate

ULTRA-C EYE CONTOUR CREAM

Lightening Anti-wrinkle

Category:

Lightening and anti-wrinkle eye contour cream **for dark circles**. Non oily, contains moisturizers. For all skin types

Instructions:

This product has a physiological mode of action and must be used daily. After the face has been thoroughly cleansed with the Pro-Derm™ Gentle Cleanser, make sure your skin is dry and apply on upper & lower eyelids once a day **before bed time**. The lightening effect is progressive over a period of 1 to 6 months. Avoid direct contact with eyes.

Benefits:

Designed for the sensitive area around the eyes, this lightening cream is used to reduce and prevent hyperpigmentation (dark circles and brown spots). By stimulating collagen synthesis and providing antioxidant properties, Ultra-C Eye Contour Cream also produces an anti-wrinkle effect. With Vitamin C 3% (MAP and L-Ascorbic Acid), Vitamins A, E, B₅, Shea Butter (Karité) and Squalane.

Active Ingredients

VITAMIN COMPLEX

Vitamin C 3%:

MAP: This form of Vitamin C, particularly active and easily absorbed, lightens the skin and interrupts the melanin synthesis responsible of pigmentation irregularities caused by heredity, hormonal factors, repeated or extended exposure to ultra-violet rays (dyschromia, lentigo, melasma). It helps to slow down the aging of the skin by inducing the synthesis of new collagen fibers (fibers which make-up the skin's structure). These fibers help the skin to resist environmental stress. MAP also regenerates an oxidized Vitamin E to an original active Vitamin E.

L-Ascorbic Acid: Anti-wrinkle and antioxidant, L-Ascorbic Acid (natural and pure form of Vitamin C) neutralizes free radicals responsible for aging the skin and stimulates collagen synthesis. L-Ascorbic Acid unifies the complexion of the skin, improves your skin tone and has light lightening properties.

Vitamin A: Anti-wrinkle and restructuring effect: stimulates collagen synthesis. The synergism of Vitamin B₅ and Vitamin A gives a toning effect. Contributes in maintaining moisture within the epidermis and the formation of the hydro-lipidic film.

Vitamin B₅: Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with Allantoin. Helps in preventing pre-mature aging of the skin and is a toning agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

Natural Vitamin E (Tocopherol): The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

MOISTURIZING & SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Aloe Vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Cholesterol: An excellent hydrating principle that restores the natural human lipid barrier. Pro-Derma Inc. uses Cholesterol from marine source only.

Glycerin: Moisturizing plant agent.

Shea Butter (Karité): An active ingredient, presented in a "butter" form, particularly rich in unsaponifiable materials, Vitamins A, D, E, F and essential fatty acids. Extracted from a nut tree found in Central Africa, Shea Butter extract has cleansing, healing, smoothing, softening, stimulating, regenerating and protecting properties. Shea Butter is also a natural sunscreen.

Squalane: Squalene is one of the main natural components of the hydrolipidic film (acid mantle). Squalane from vegetal (olive oil) origin has a natural affinity to the skin, is easily absorbed, prevents moisture loss and restores the skin suppleness and flexibility.

Capric-caprylic Triglyceride: A plant emollient, which hydrates dry and delicate skin.

Ingredients INCI

Aqua, Caprylic/capric triglyceride, Glyceryl stearate SE, Shea butter (Butyrospermum parkii, Magnesium ascorbyl phosphate, PEG-8, Glycerin, Butylene glycol, Squalane, Cetyl alcohol, Myristyl myristate, Cholesterol, Sodium citrate, Allantoin, Phenoxylethanol, Panthenol, Imidazolidinyl urea, Tetrasodium EDTA, Citric acid, Tocopherol, Ascorbic acid, Triethanolamine.

SERUM-C 5% & 10%

Antioxidant Lightening

Category:

Antioxidant and anti-free radical serums, for all skin types.

Instructions:

After the face has been thoroughly cleansed with the Pro-Derm™ Gentle Cleanser, make sure your skin is dry and apply on face, neck and chest (Serum-C 10%) or on upper & lower eyelids (Serum-C 5%). Apply once a day in the morning before your sun protection or any other Pro-Derm™ products or make-up.

Benefits:

The high concentration of non neutralized L-Ascorbic Acid (Vitamin C, antioxidant) in the Pro-Derm™ serums stimulates collagen synthesis and helps prevent and reduce the damaging effects of environmental free radicals that are responsible for skin aging. Daily use prevents wrinkles and produces a tightening effect. They lighten the skin and give a uniform and glowing complexion. Applying Serum-C 10% before using a sunscreen will increase the skin's resistance to pollutants and ultra-violet rays.

L-ASCORBIC ACID

High Concentration

SERUM-C 5% & 10%

Active Ingredient

Vitamin C: Anti-wrinkle and antioxidant, L-Ascorbic Acid (natural and pure form of Vitamin C) neutralizes free radicals responsible for aging the skin and stimulates collagen synthesis. The formation of new collagen fibers produces a tightening effect and increases your skin's resistance to pollutants and ultra-violet rays. L-Ascorbic Acid unifies the complexion of the skin, improves the skin tone and has light lightening properties.

GENTLE CLEANSER

Soft & Soothing

Category:

Gentle Facial cleanser, for all skin types.

Instructions:

Due to its concentration, only a small quantity is needed. Leave it on your skin for a few seconds and rinse with clear water.

Benefits:

Most cleansers and soaps are alkaline. They irritate the skin and partially neutralize the action of Glycolic Acid (AHA). Pro-Derm™ Gentle Cleanser, with an optimal acid pH of 4.5, maintains the skin's protective acid mantle and is specially formulated to maximize the results of all our products. Pro-Derm™ Gentle Cleanser contains 40% certified BIO Aloe, BIO Lavender essential oil and is enriched with Allantoin. It effectively cleanses and soothes the skin, rinses completely with water and leaves no residue.

GENTLE CLEANSER

Active ingredients

-GLYCOLIC ACID:

Removes dead skin cells and stimulates renewal of the epidermis.

-VITAMIN B₅:

The major antioxidant function of Vitamin E is to prevent lipid peroxidation. Several studies have documented photoprotective effects when Vitamin E was topically applied to skin. Vitamin E also enhances the absorption of active ingredients.

-MOISTURIZING & SOOTHING AGENTS

Allantoin: This active ingredient, originating from comfrey-roots, stimulates the cellular renewal and healing process. Effective against blemishes and on irritated or dry skin.

Aloe vera certified organic 40%: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Lavender essential oil certified organic: Lavender is renowned for its many beneficial properties: healing, antiseptic, anti-inflammatory, relaxing, soothing and calming. It is used against sun burns and on irritated skin. Recommended for delicate, dry, flaky, congested, acne-prone and red-prone skin.

Ingredients INCI

Aqua, Aloe Barbadensis Leaf Extract, Sodium Laureth Sulfate, Disodium Cocoamphodiacetate, Cocamidopropyl Betaine, Cetyl Alcohol, Triethanolamine, Allantoin, Panthenol, Acrylates/C10-C30 Alkyl Acrylate Crosspolymer, Butylene Glycol, Phenoxyethanol, Kaolin, Imidazolidinyl Urea, Glycolic Acid, Lavandula Angustifolia (Lavender) Oil, Hydroxyethylcellulose, PEG-40 Hydrogenated Castor Oil PCA Isostearate, Cymbopogon Martinii Oil Polyquaternium-7, Trisodium EDTA, Citric acid.

Soothing Moisturizing Matte Effect

Category:

Soothing masque for face, neck or upper chest, as needed. For all skin types.

Instructions:

After the face has been thoroughly cleansed with the Pro-Derm™ Gentle Cleanser, make sure your skin is dry and generously apply the TerreusMasque^{CM} (about 3 mm thick layer). The masque will not dry on your skin. After 20-30 minutes, take off the masque with a warm facial cloth and rinse with clear water. It can be used once a week.

Benefits:

This masque offers many unique benefits. TerreusMasque^{CM} tones, moisturizes and lightly exfoliates the skin. At a 20% concentration of Thermal Mud and Sea Clay, this product can reduce sebum by up to 12% and leaves the skin feeling matte. Thermal Mud and Sea Clay are important active ingredients high in Amino Acids and Humic Acid.

Following a cosmetic skin treatment, TerreusMasque^{CM} initiates an immediate soothing feeling. It also reduces redness of the skin and removes the sensation of heat.

Weekly application will maintain the radiance of your skin.

THERMAL MUD

SEA CLAY

ESSENTIAL OILS

MOISTURIZING & SOOTHING AGENTS

Paraben-Free

Active Ingredients

THERMAL MUD

100% pure, European origin, naturally rich in organic matter providing principally Humic Acid (48%), Amino Acids, minerals, vitamins and trace elements. There are many properties attributed to the Thermal Mud; as you apply it on the skin, it instantly soothes, tones and improves the skin's surface, it unifies the complexion and closes the facial pores. It lightly exfoliates, hydrates and stimulates cellular rejuvenation. At a high concentration (20%), the Thermal Mud is a sebum reducer, up to 12%. It helps activate blood circulation, eliminate toxins and soothe certain cutaneous problems: acne, psoriasis and eczema.

SEA CLAY

It contains precious trace elements necessary for the enzymatic reactions of the cellular metabolism. Clay is used for its remineralizing properties. It also processes incomparable detoxifying properties.

ROSEWOOD ESSENTIAL OIL

Due to its powerful ability to regenerate, soothe and tone the skin, it is highly recommended for facial care. It vitalizes dull, stressed, tired, fragile and irritated skin. This essential oil has a pronounced anti-wrinkle effect and restores the skin's elasticity.

MOISTURIZERS & SOOTHING AGENTS

Aloe Vera certified organic: It is known for its moisturizing, softening and healing properties. This natural anti-stress for the epidermis is recommended for couperosis, dry or delicate skin.

Shea Butter (Karité): An active ingredient, presented in a "butter" form, particularly rich in insaponifiable materials, vitamins A, D, E, F and essential fatty acids. Extracted from a nut tree found in Central Africa, Shea Butter extract has cleansing, healing, smoothing, softening, stimulating, regenerating and protecting properties. Shea Butter is also a natural sunscreen.

Lavender Essential Oil certified organic: Lavender is renowned for its many beneficial properties: healing, antiseptic, anti-inflammatory, relaxing, soothing and calming. It is used against sun burns and on irritated skin. Recommended for delicate, dry, flabby, congested, acne-prone and red-prone skin.

Ingédients INCI

Black Liposilt® (thermal mud with Humic acid), Aloe (Aloe barbadensis extract), Shea Butter (Butyrospermum parkii), Sea clay (Manicouagan clay™), PEG-40 hydrogenated castor oil PCA isostearate, Phenoxyethanol, Lavender essential oil (Lavandula angustifolia) and Aniba rosaeodora essential oil.
